English

Nepali

PROJECTS

Codelecta

Multi-page educational website for learning programming languages with responsive design and semantic HTML markup.

- Implemented responsive design and semantic markup for better accessibility
- Collaborated with three team members using Git/GitHub

Tech: HTML, CSS, Git, GitHub

<https://codelecta.surge.sh/> 🌐

Quote Collector using React-JS

React-based application for collecting and displaying quotes with component-based architecture.

- Demonstrates solid understanding of React fundamentals and component-based architecture
- Showcases ability to build interactive user interfaces

Tech: React J.S.

<https://quote-collector.surge.sh/> 🌐

Memoire-Journals

Memoire is a personal journaling web app for writing and managing entries in one place. It includes a rich text editor, a date-based timeline, a people tracker for mentions, and a photo section linked to journal entries.

- Demonstrates solid understanding of React architecture with custom hooks, context providers, and component composition
- Showcases Firebase integration for authentication and Firestore-based persistent storage

Tech: React J.S., Firebase
